In the next few minutes, we're going to give you a sneak-peak into a proven sales system that involves selling products online, but not in a way that you would have likely seen before.

It's simple, fast and effective - and we firmly believe that it's possible to achieve incredible results using it, if you take action and put in the effort.

In fact, the GOOD NEWS is...

- ✓ You don't need a website to get started...
- ✓ The focus is entirely on FREE TRAFFIC...
- ✓ There is no need to do any "marketing" ...
- ✓ You only sell established high-margin products that are in demand.

...and best of all, you're leveraging a colossal marketplace that gets up to **65 million visitors every single day!**

It's a marketplace that my business uses to generate as much as \$300,000 in product sales each month (over multiple accounts)...

...and I can tell you right now, it is the biggest, most powerful marketplace ON THE PLANET!

Now, just to be 100% transparent with you, *our* results are NOT typical. **We have a lot of experience** running online businesses which helped us reach these sales numbers. As you'll know, the

revenue figures illustrated here are not intended to guarantee results either. Your own results may vary.

But the GOOD NEWS is that in the next few minutes you'll discover how **you could TAKE ADVANTAGE of this experience** to build a successful online business *yourself*...

A business which could provide you with flexibility and stability in your life...

...and hopefully A LOT more!

See, over the past 10+ years we've published multiple training courses on how to build successful businesses online.

We've taught affiliate marketing, ebook publishing, creating and selling physical products, to name but a few.

There is **one very good reason** why we have done this for all these years...

Simply put - we never get tired of receiving positive feedback from our students. *In fact*...

Some of the stories we've heard from those who've taken action and followed our training have been remarkable.

To give you an idea, take a look at some of the feedback myself and my team have had...

“The impact he has had on my personal and business life is unrivalled...”

“My first training course with Aidan was in 2012, and I’ve been with him ever since. Aidan is a genuinely kind, caring, trustworthy person who has the rare ability of imparting his knowledge and getting the message across through his method of teaching.

The impact he has had on my personal and business life is unrivalled, with his training courses being the only ones I will recommend. These days trust on the internet is crucial and Aidan is without question one hundred percent trustworthy. Guaranteed!”

Anne Oliver, Adelaide, Australia

“I have participated in several of Aidan’s training courses and found them to be superb...”

“I have participated in several of Aidan’s training courses and found them to be superb, always delivering more than was promised. His materials provide detailed, step-by-step guidance to include videos and written tutorials. The support team was always available to quickly answer all my questions and provide any assistance I needed.

Aidan provides more than the tools needed to build a successful online business, he also provides mindset and goal achieving strategies needed to build and maintain a successful life.”

Anthony Grayson, United States

“It has been a great experience and can see myself growing my business even further...”

“Knowing Aidan for the past 3-4 years with his team and working with him has been a huge benefit for my businesses.

Not only have I learned new strategies and business models but the mindset and habits of running and growing a business! Its been a great experience and can see myself growing my business even further with less of my time as I build my own team.”

James Chien, United States

“Profoundly transformed both my personal approach to online business and the success of my ventures...”

“Over the last decade, engaging with Aidan's training has profoundly transformed both my personal approach to online business and the success of my ventures. I seize every chance to work with Aidan, as each session is a guaranteed learning opportunity.

His unique blend of practical guidance and insightful strategies has done more than just enhance my understanding of the online business landscape; it's been a catalyst for significant, sustained growth in my own projects.

Mark Mason, United States

Now, please be aware, these results are not 'typical'. Like I said a second ago, these students followed our training carefully and took consistent action to make it work. They are not guarantees of your own success, if you implement what we are laying out today.

But here's the exciting part...

What we are telling you about in this book is something we regard as *THE simplest and the most effective way to build a successful online business in 2024.*

- ★ It doesn't matter if you have ZERO experience selling online...
- ★ It's highly complementary if you ALREADY have an internet business too, as it's a great way to generate an additional income stream...

...and I'm very excited to tell you about it.

BUT...*before* we get into the juicy details...

There is a SIGNIFICANT WARNING I need to give you upfront...

If you're expecting a multi-layered "magic bullet" here with shiny bells and whistles, then you may be disappointed.

Here's why...

The system we're talking about is EASY to understand and surprisingly UNCOMPLEX.

One could almost describe it as **BORING!**

But **don't** be **ALARMED...**

The key to building a great online business, especially when you are searching for your first success, is taking the **PATH OF LEAST RESISTANCE**

...and that is *precisely* what this is all about.

Let me explain...

The core model here is selling High-Margin Products online with no complications.

Here's why...

- ✓ You don't need a website to get started.
- ✓ You only use FREE TRAFFIC.
- ✓ You don't need to do any product development.
- ✓ You don't need to do any branding or packaging.
- ✓ You don't need to make massive inventory orders.
- ✓ There are no delays (this can be really FAST).
- ✓ There's no "guesswork" involved (you'll see why soon!)

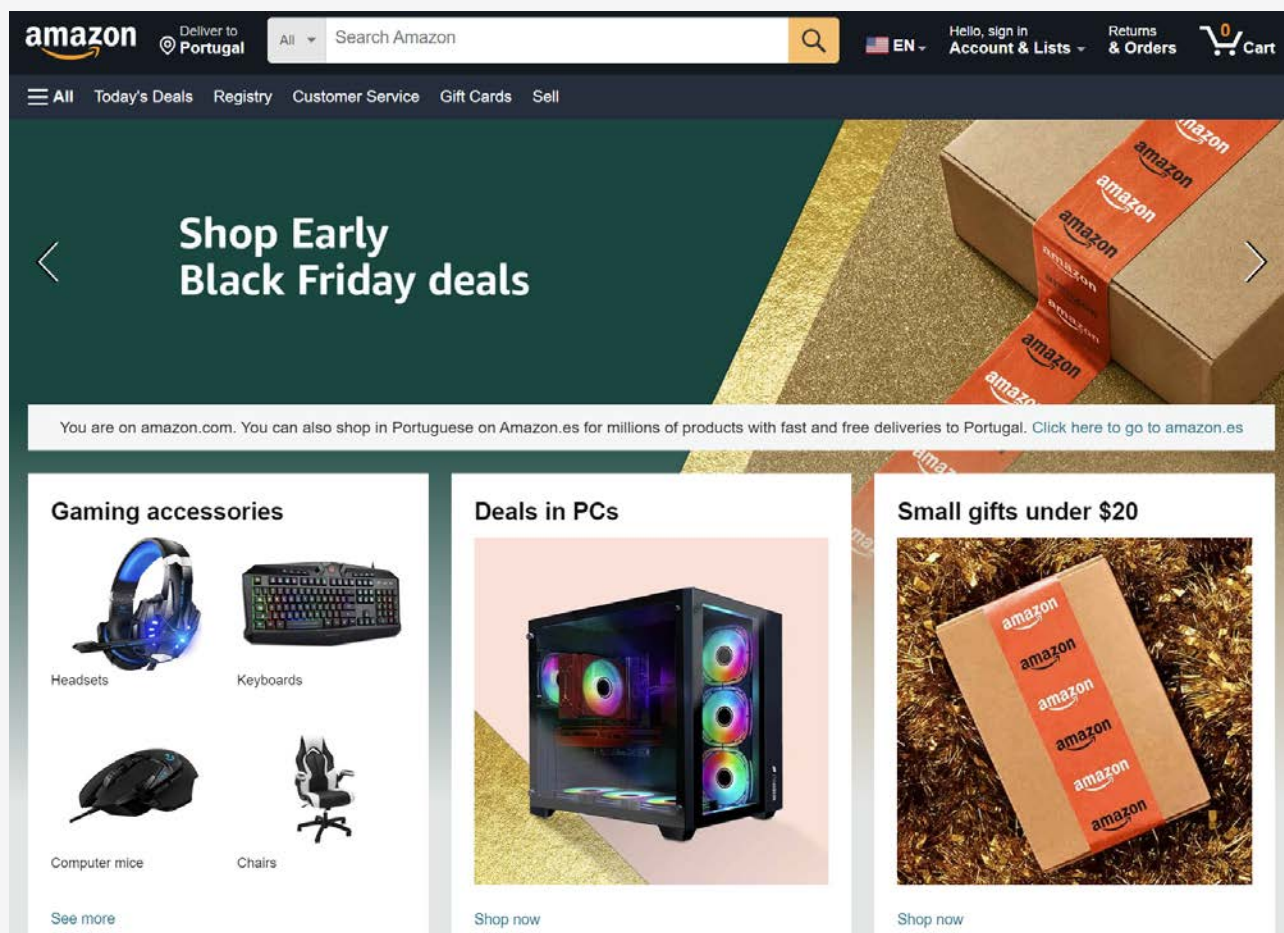

...and you sell these simple products on **Earth's biggest marketplace.**

OK - just before we go any further...

Let me address the "elephant in the room"...

I know you'll be wondering what this marketplace is - so I'll tell you right upfront...

It's Amazon.

Now before you jump to any conclusions, hear me out...

There are THREE massive advantages when selling on Amazon...

 **#1: Amazon has MONSTER Traffic.** In the past 12 months alone, it had over 2 BILLION website visits from people looking to do one thing...PURCHASE PRODUCTS!

#2: Amazon SOLVES the complications that are commonly experienced when selling products online. They deal with shipping, customer service, payment processing and a whole lot more.

#3: People TRUST Amazon. They trust that they'll receive products quickly and efficiently and that their data and payment details will be kept secure.

Essentially what this means is by selling on Amazon you are “piggy-backing” off their brand power and credibility, which is a gigantic advantage when it comes to sales and conversions.

Now, I know what you may be thinking...

“Isn't selling on Amazon old news?... Haven't I seen this multiple times before?”

Well, in terms of what we are talking about today *specifically*, the answer is **PROBABLY NOT.**

Here's why...

We completely IGNORE The “Mainstream Method”

...In other words, the process that MOST people use to try and sell products and make money on Amazon.

Here's what most people do...

1. Pick a popular category (fitness, kitchen etc)
2. Find a popular product that makes money.
3. Figure out a unique angle for your own product.
4. Deal with design, branding, product development etc
5. Find a manufacturer in China.
6. Order a HUGE amount of inventory and deal with insanely complex shipping & customs processes.
7. Bring it to market by yourself.
8. ****HOPE**** it sells!! (and that you make profits!)

The problem with the above is **4-FOLD**...

It is **SLOW, RISKY, EXPENSIVE and STRESSFUL.**

What I'm talking about is something different. You never need to do ANY product development at all.

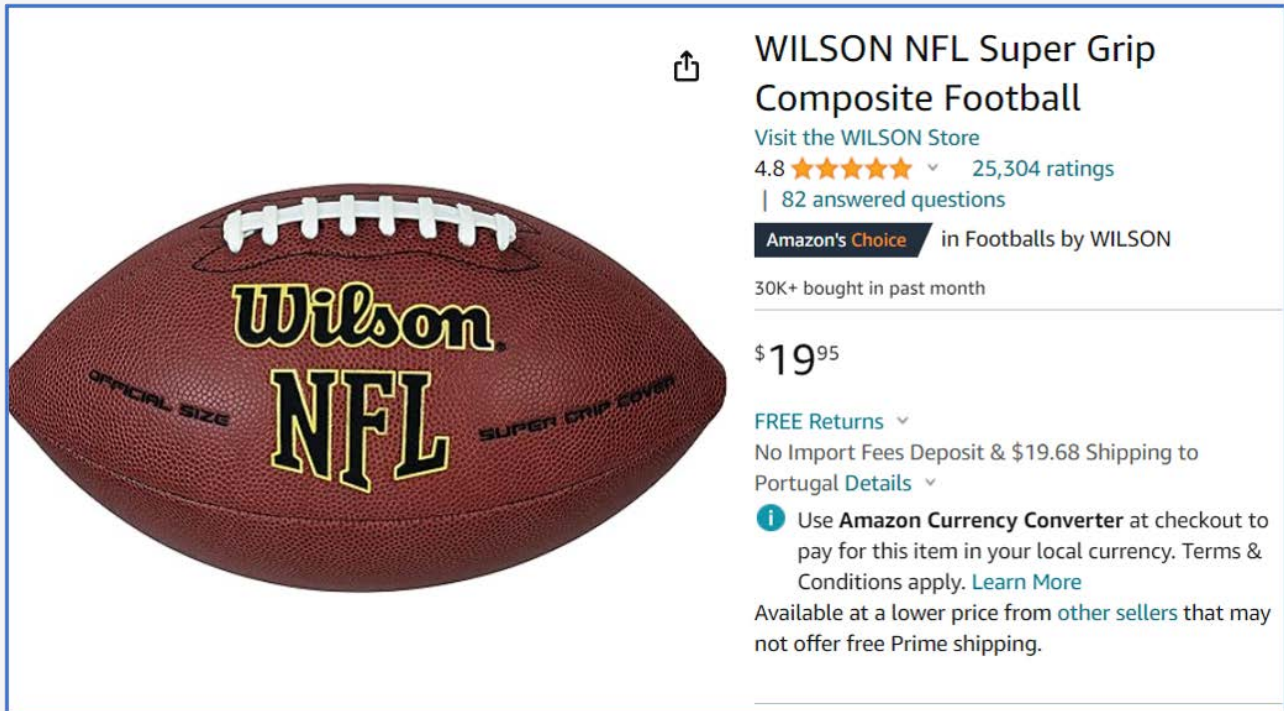

With this system, you identify and sell established, PRE-EXISTING products that you **already know sell successfully and have HUGE DEMAND and HIGH-MARGINS**

Once you have identified a product, you ...

- **BUY a small amount of product inventory** from a WHOLESALER supplier at a low price...
- **SELL the inventory on Amazon** using FREE Traffic for a higher price.
- **PROFIT from these sales** then use the funds to SCALE UP

A SIMPLE EXAMPLE...

We BUY **20** NFL Footballs from a wholesale supplier at \$10 EACH.
(in other words, a product that already has HIGH-DEMAND)

We list them on Amazon at \$19.95 each.

We sell all 20... make a \$9.95 profit per sale = **\$199 total profit**

Then we find MULTIPLE more products to sell... sell them in exactly the same way... and THAT is how we build up the business.

Now this is just a demonstrative example. There are Amazon fees involved too of course. I'm simply trying to get across how this model works.

Here is why this can be a **FASTER** and **SAFER** way to build an online business...

- ★ You only sell high-margin products you KNOW people are BUYING...
- ★ You don't need a website to get started.
- ★ You don't need to deal with China, and all the complexities that come with that.
- ★ You don't have to worry about placing huge inventory orders to get started...
- ★ You don't need employees...
- ★ You don't need a budget for paid ads or marketing as the traffic is FREE...
- ★ You don't need to write headlines or product descriptions...
- ★ You don't need to do any product development, branding or packaging design...
- ★ You don't need to see or handle the products you sell...
- ★ You can do this part-time...
- ★ AND with this system you use Microsoft, Facebook and Google to *BOOST your sales* (in other words, **Amazon is just the starting point.**)

It is simple and uncomplicated. And like I mentioned a moment ago, this is the path of least resistance if you want to build a successful business online in 2024.

But here's where it gets EVEN BETTER...

We have developed a series of AMAZING **SHORTCUTS** that could DRAMATICALLY speed up rate in which sales can be made using this system – and the good news is that you could use them too.

We have spent 12 months and hundreds of thousands of dollars developing these SHORTCUTS, and what we've devised is...

A breakthrough of SUCH MAGNITUDE
that it could change the way people
build online businesses FOREVER!

These shortcuts help remove the “guesswork”, leapfrog the learning curve... and could put you in a great position to build a successful online business in 2024.

But what are they exactly?

Well, what I can tell you right now is that no one has EVER attempted to create “shortcuts” like these before (as far as we know) ... *And I can promise you one thing...*

Even if you’ve TRIED selling on Amazon before, what we have in store is going to BLOW YOUR MIND! We are taking it to an ENTIRELY new level.

I will tell you more about them shortly. But be aware...

You need to attend one of our live webcasts to find out **THE FULL DETAILS...**

SECURE YOUR SEAT HERE:

www.7figureworkshop.com/register

** Our Company is a professional eCommerce business with years of experience. The revenue figures illustrated here are not intended to guarantee results. Your own results may vary.

OK, let's rewind for a second...

What I want to do now is break down the 7 “manual” steps of running an Amazon Wholesale business so you can get a grasp of how the core model works.

You could call this... “the old way”.

Then I’m going to REVEAL how the shortcuts we’ve developed trim down or even eliminate many of these steps entirely.

Ok, let’s get started... Take just a moment to digest this...

So let’s run through these steps in more detail... and just to reiterate, ***** this is the OLD way of running this model ***** - many of these steps are ELIMINATED due to the shortcuts we’ve developed.

1

STEP 1

Find A Supplier

First of all, we need to find a reliable wholesale supplier who stocks products that could make a profit when sold on Amazon.

Here's how...

1. Pick a top-level category you want to sell in. As a random example, let's say "Pet Supplies".
2. Identify wholesale suppliers for this category with a quick Google Search or by asking AI.
3. Visit the suppliers' website(s) and sign up to become a "dealer" or "vendor".
4. Then access their product catalog.

But what type of suppliers are we looking for?

Well, some suppliers are mammoth entities, while others are smaller, catering to specific niches. **What we're looking for are larger suppliers with an extensive product range.**

As a hypothetical example, it's better to seek a large-scale pet product supplier rather than a small supplier dealing *solely* in fish tank parts. *Like this...*

GOOD NEWS! With the shortcuts we've developed, you WON'T need to find suppliers in order to get started and begin making sales.

We've already found them for you! We've dealt with all the registration and set up on your behalf.

2

STEP 2

Identify Opportunities

Once you have found a supplier, the next thing you need to do is search their catalog for products that are ALREADY selling successfully on Amazon.

In case you didn't know, **multiple people can sell THE SAME product on Amazon**. Amazon simply rotates the listings. (This means the different sellers of a particular product all get an equal portion of the traffic).

To demonstrate, look at this random listing on Amazon. Can you see bottom right where it says, **“Other Sellers On Amazon”**?

The screenshot shows an Amazon product listing for a 'Christmas Advent Candle Set (Set of 4) - Made in The U.S.A.' by Vermont Christmas Company. The product is priced at \$8.89 (\$2.22 / Count) with a 32% discount from the list price of \$12.99. It has a 4.7-star rating from 6,626 reviews and is an Amazon's Choice product. The listing includes a 'Delivery' section with a 'FREE delivery' offer for December 4-5, an 'Add to Cart' button, and a 'Buy Now' button. At the bottom right, there is a section titled 'Other Sellers on Amazon' which lists two alternative sellers: 'Best-To-You' for \$8.89 with free shipping, and 'Marco's Emporium' for \$8.95 plus \$2.51 shipping. The 'Other Sellers on Amazon' section is highlighted with a red box in the original image.

Take a look at this close up. As you can see, there are two other sellers who sell this particular product.

Best-To-You and **Marco's Emporium.**

So when someone searches for this product on Amazon, (or when it shows up in the search results), Amazon will rotate these listings.

Other Sellers on Amazon

\$8.89 (\$2.22 / Count) & FREE Shipping Sold by: Best-To-You	Add to Cart
\$8.95 (\$2.24 / Count) + \$2.51 shipping Sold by: Marco's Emporium	Add to Cart

In other words, in one instance, it will show Best-To-You's listing. In the next instance it will show Marco's Emporium's listings. And so on.

Therefore, a great opportunity is a product which has:

- ✓ **A PROVEN sales history** (ie. we KNOW it sells well)
- ✓ **A HIGH margin** (ie. The wholesale unit cost vs the sales price on Amazon)
- ✓ **A LOW number** of other sellers.

To be more specific, we want a product where you could potentially capture 100 – 300 sales per month and make a **profit margin of 10% - 50%.**

*So what we need to do is **assess the following** for each product listed in the supplier's catalog to identify products that could achieve this:*

1. Sales Volume:

The review rate of products on Amazon is generally 1%. Therefore, if you can see that a product generates around 3 reviews a month, you can make the assumption that it is **selling approximately 300 units per month**.

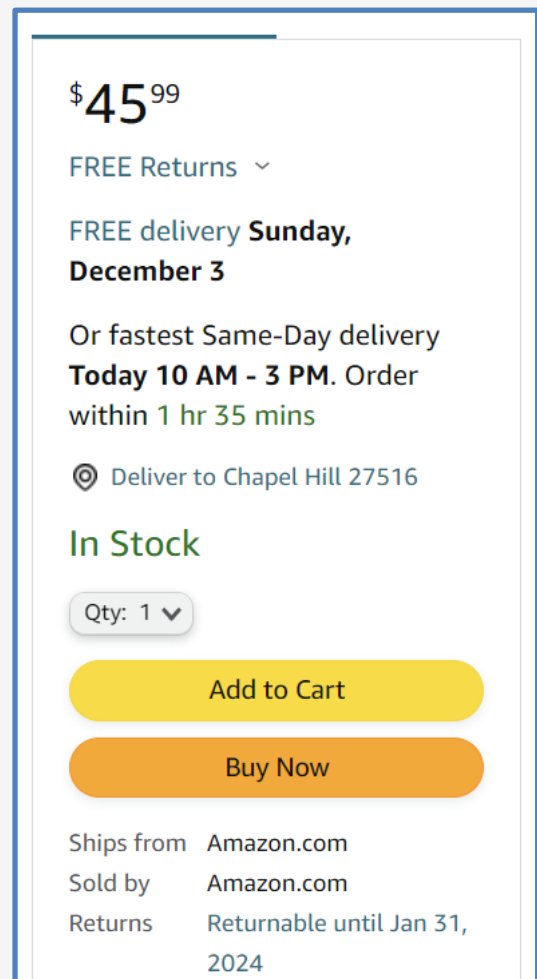

2. Number Of Other Sellers:

If you know that there are approximately 300 units of a certain product selling each month, and there is just one other seller, **this means you could potentially capture 150 sales per month**. (Again, this is because Amazon ROTATES the product listings)

3. Buy Box Price:

The Buy Box price shows you what a product is being sold for on Amazon (you can see an example of a buy box on the right) →→→

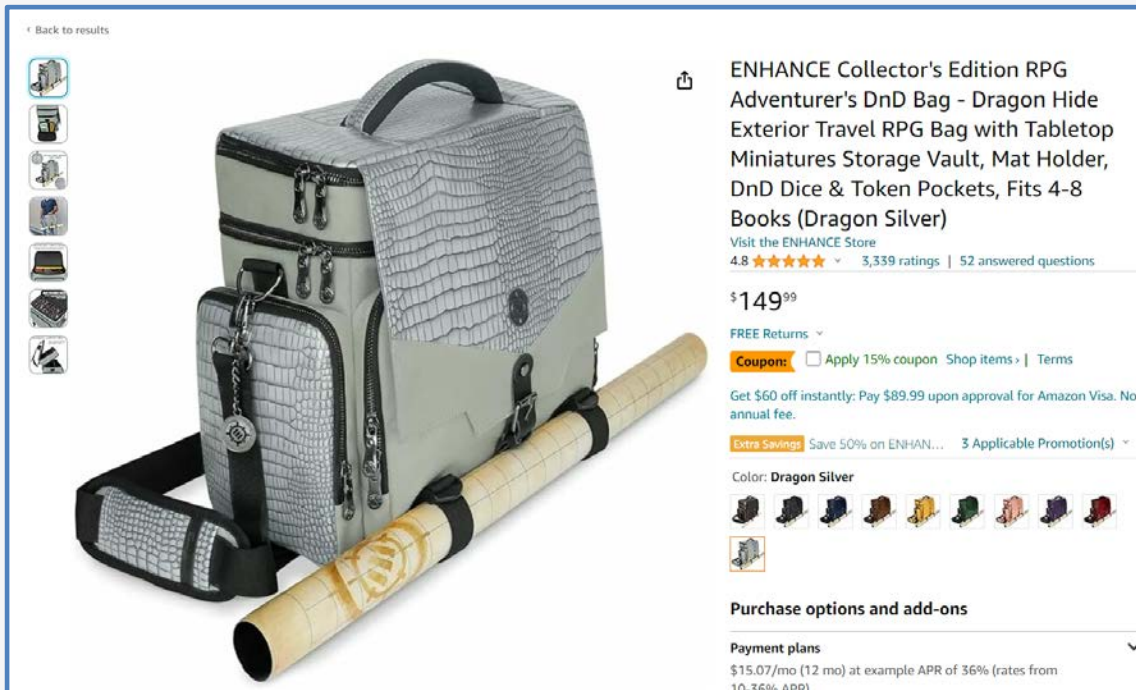

If the buy box price is \$45.99, this means you would need to sell the product at \$45.99 (or less) in order to actually get sales. Then you can look at the wholesale unit price, in order to assess whether you would be able to achieve a 10% - 50% margin after shipping costs and Amazon fees.

The image shows a screenshot of an Amazon product page's buy box. The price is \$45.99. Below the price, it says 'FREE Returns' with a dropdown arrow. The delivery information is 'FREE delivery Sunday, December 3'. Below that, it offers 'Or fastest Same-Day delivery Today 10 AM - 3 PM. Order within 1 hr 35 mins'. The delivery location is 'Deliver to Chapel Hill 27516'. The status is 'In Stock'. There is a quantity selector set to 'Qty: 1'. Below the quantity selector are two buttons: 'Add to Cart' (yellow) and 'Buy Now' (orange). At the bottom, it says 'Ships from Amazon.com', 'Sold by Amazon.com', and 'Returns Returnable until Jan 31, 2024'.

At this point, the aim is to have a list of around 10 product opportunities.

Here are some examples to give you an idea of the type of products we're looking for:

GOOD NEWS! The above seems like a lot of work (which it is!) - but with the **SHORTCUTS** we've developed...

You WON'T have to identify opportunities yourself in order to start selling. We've created a massive vault of product opportunities that you can choose from.

3 **STEP 3** Pinpoint a Winner

After completing Step 2, we should have a list of 10 product opportunities. **Now we need to finalize which one we'll move ahead with** by running two final 'sanity check' tests.

Test 1. Check Recent Reviews: By examining the number of reviews a product has received in the last 30 - 60 days, you can

CONFIRM its current popularity and BE SURE the product is selling NOW.

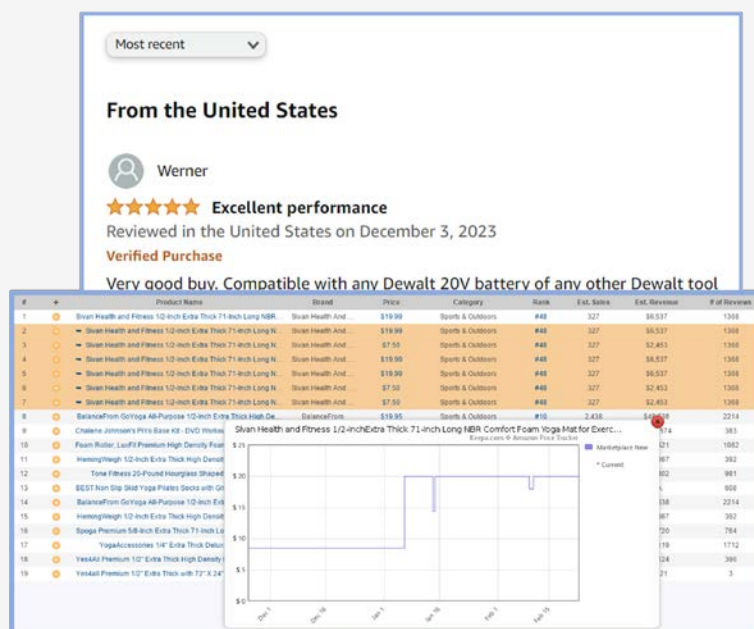

Again, you can check this in the reviews section of an Amazon product listing by looking at the dates that the most recent reviews were published.

Test 2. Check The Sales

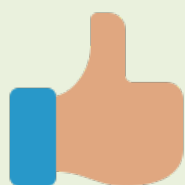

Data: The second sanity

check involves using a special online tool that checks the long-term data of a particular product and provides

insights into its sales history on Amazon. You want to ensure that the product has a steady or growing sales volume.

OK - at this point, we have whittled down our 10 opportunities to **ONE potential winning product** to move ahead with.

GOOD NEWS! You will NOT have to pin-point winners to start selling. Our next shortcut (our private "Buyers Club") will give you hand-picked, pre-vetted products with validated demand that you can run with !

4

STEP 4

Set Up The Listing

The next step is to list the product on Amazon.

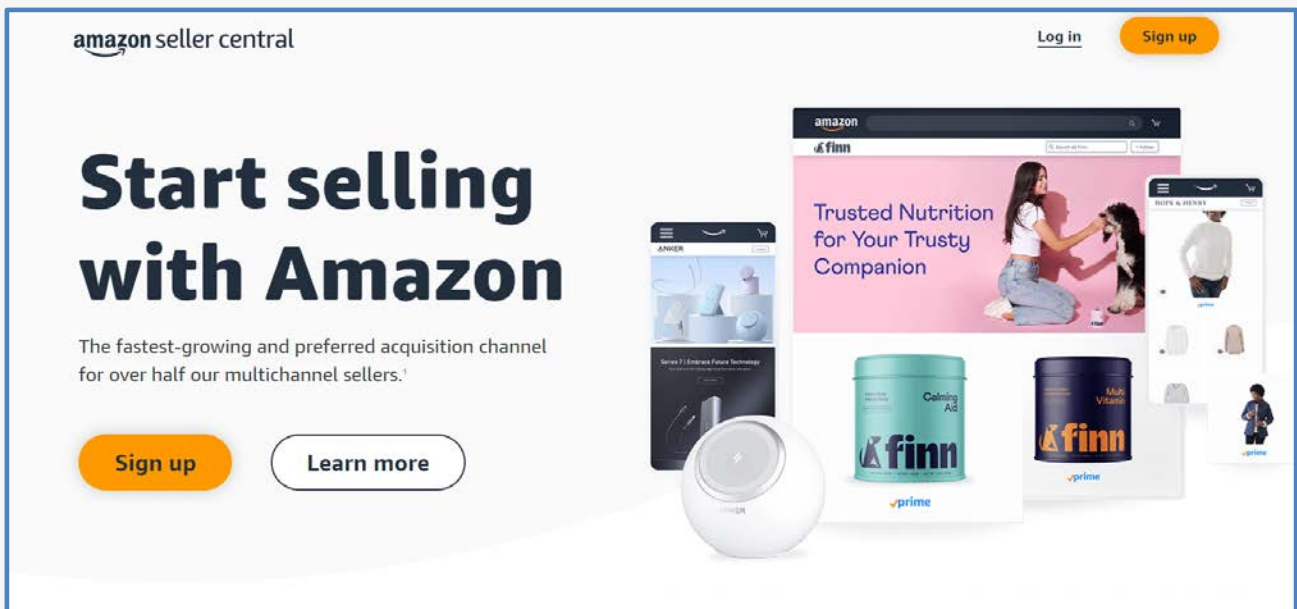

Listing a product on Amazon is usually time consuming because you need to choose the category as well as create keywords, title, description and images.

But in this case, **you are selling a product that is ALREADY on Amazon.**

This means MOST OF THE WORK IS ALREADY DONE.

Here's the process...

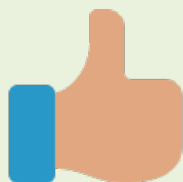

1. Register an account on Amazon Seller Central.

2. Search for the product within your Amazon dashboard.

3. Enter how many units you have to sell and the price that you want to sell them at.

This is super-quick. Once this is done, **you're ready to start selling.**

GOOD NEWS: You can do this even faster using our in-house strategies that will take the guess work out of the listing process.

5

STEP 5

Send In Products

Once you have listed the product, the next step is to purchase product inventory from the supplier. The sweet spot is around \$50 to \$500 in inventory, depending on the product.

Once you have received the inventory, prepare the units to be shipped to an Amazon warehouse so Amazon can send them to buyers directly, when they get sold. *Here's how...*

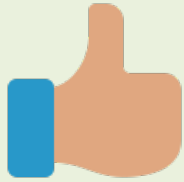

1. Prepare Your Products: Login to your Amazon Seller account then print and attach the labels that Amazon provides to each of the products.

2. Create a Shipping Plan: This is where you let Amazon know the number of boxes you'll be sending, the number of items in these boxes, the nature of the items, the dimensions of the boxes, and their weight.

Then get them sent into Amazon using their deeply discounted inbound UPS shipping rates. And that's it!

Note: *If you were doing this the manual way, you can use a 3rd party company to do all this for you. However...*

GOOD NEWS! Our shortcuts **ELIMINATE** the need for you to handle or prepare **ANY** inventory. The staff at our private 40,000sqft warehouse can do this for you!

6

STEP 6

Kick-Start Sales

The next step, and undoubtedly the most exciting one, is when you **start selling!**

The amazing thing about this (assuming the research has been done correctly!) is that people will ALREADY be searching for the product on the Amazon marketplace.

This means you simply take advantage of Amazon's existing customers and MONSTER traffic.

You don't need to do any marketing whatsoever or pay for ANY ads. All the traffic is FREE.

Quite simply, the objective is to sell through all the inventory, restock, and keep on selling.

GOOD NEWS! You could **accelerate your sales** using a number of optimization shortcuts that'll drive even more traffic to your listings.

7

STEP 7

Begin Scaling Up

There are a number of elements to scaling this business model...

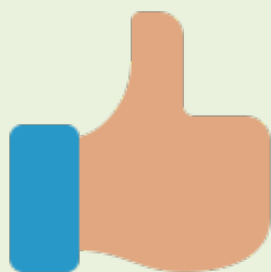

#1: Rinse and repeat the steps. Once you have your first product live, identify **ADDITIONAL** products, get them out to the Amazon marketplace, **snowball your sales and increase your revenue.**

In fact, you can do this by returning to your initial list of 10 opportunities created in step 2 and selecting other products to begin selling.

#2: Expand your marketplaces. Once you have a good number of products up, running and selling on Amazon, you can take scaling one step further by pushing your BEST SELLING products out to *Google Shopping, Microsoft shopping along with the Facebook Marketplace.*

This will allow you to put them in front of thousands more potential buyers for no additional cost and could dramatically help build your business.

IMPORTANT: You may think bringing multiple marketplaces into play sounds like a huge challenge. However, **we have an incredible SHORTCUT that could drastically reduce the time it takes to accomplish this.**

So that's it... The old "manual" way of running an Amazon Wholesale business explained.

Just Before We Go Any Further, Let Me Recap In Simple Terms What We Are Doing...

- We're BUYING established, high-margin products from wholesale suppliers, at a low price...
- We're SELLING the products on Amazon for a higher price (using FREE Traffic) ...
- We're collecting the revenue and profit... then scaling up.

This is not rocket science. We are **simply applying the first principles of business...**

But Here's The GOOD NEWS...

After training people to run online businesses over the past 10+ years, we have a very good idea where and why people run into "roadblocks" and consequently get stuck.

And that is why, as I alluded to already, we have invested an enormous amount of time and money eliminating these roadblocks by developing **a series of groundbreaking SHORTCUTS.**

We were going to keep this PRIVATE... something only available to us, and a small mastermind group.

But We Wanted To Make A HUGE IMPACT in 2024 and completely change the game.

You'll have to join us on one of the live webcasts to find out the full details, but what I can tell you right now is that to implement

this system and start making sales will become a WHOLE LOT EASIER.

Here's why...

You won't need to find and register with suppliers' (we've done this for you)

You won't need to find products to sell (we've done this for you)

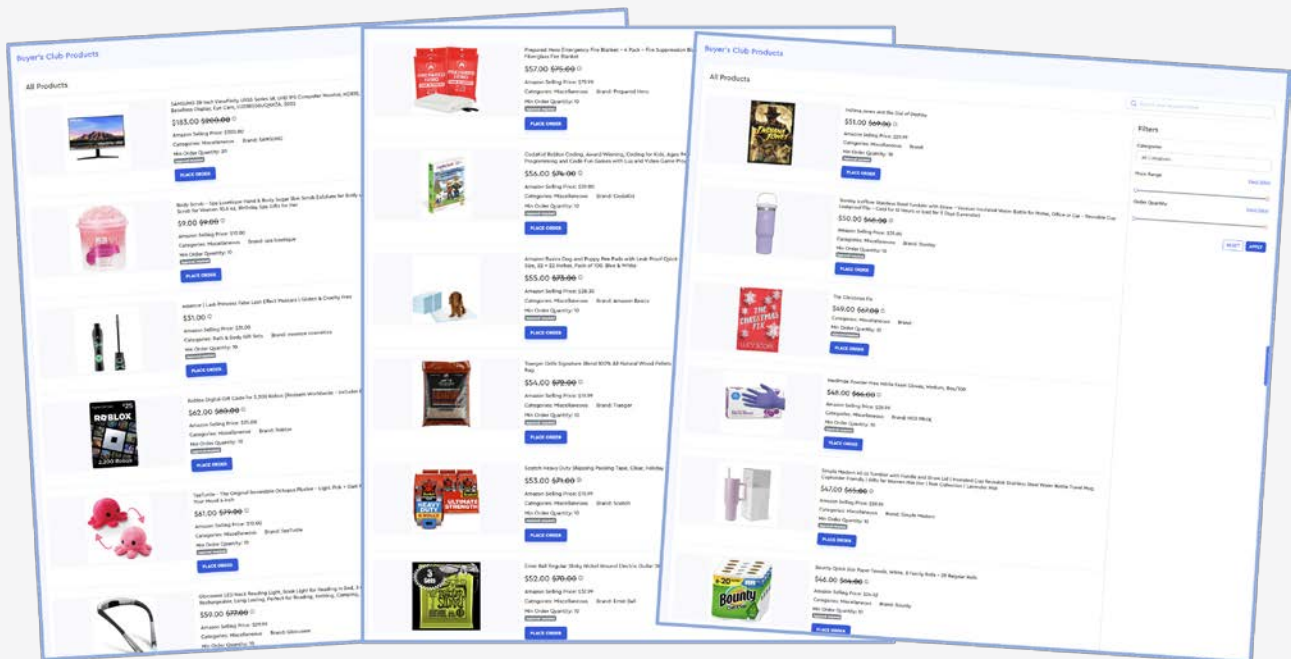

You won't need to handle, pack OR ship your products (We do this for you)

We've developed incredible tools that'll allow you to effectively scale up. Plus...

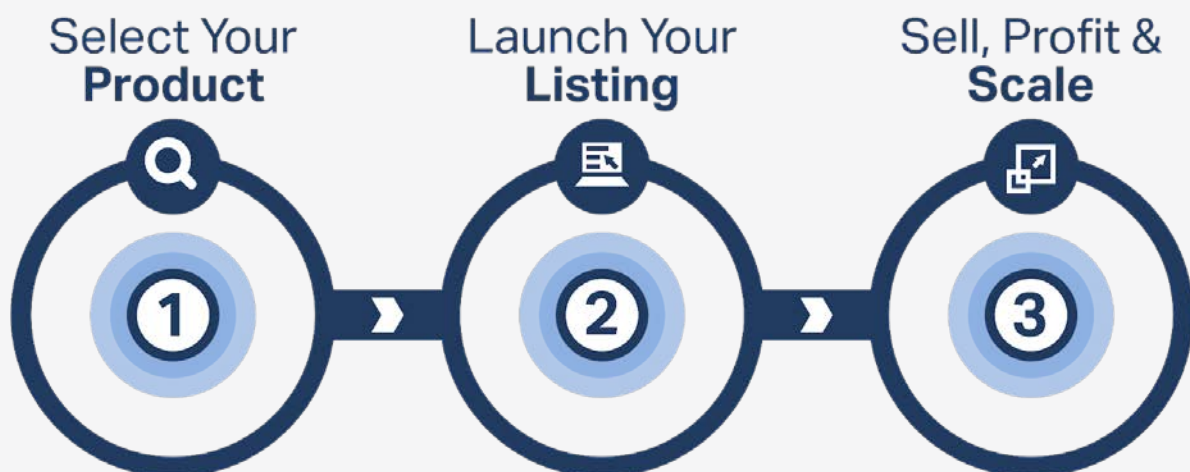

You'll get access to REVOLUTIONARY Software...

You'll get access to our [AMAZING Team...](#)

...And with all the software, done-for-you services and shortcuts we're going to hand you, the process of launching your business and **getting your first products live and selling** are trimmed down to **3 Simple Steps**

Simply put... YOU select a product.

We do the rest!

It simply doesn't matter if you are someone who has little to no experience selling online...

... and it ESPECIALLY doesn't matter if you are someone who has tried selling on Amazon before...

What we have in store could allow someone who is willing to listen, take action, and has access to a computer or laptop to build a really successful online business in 2024.

You are not going to want to miss out on the details.

To Sum up... Here are 8 Key Benefits Of This Amazing System...

1. We only sell products that we **KNOW PEOPLE ARE BUYING**

The objective is to only sell products with a proven sales history, high margins and a low number of other sellers. This will dramatically increase the chances of seeing success.

2. A lot of the **WORK has been done for you.**

To get started, you simply take advantage of our hand-picked products and get them into Amazon using our private warehouse services. You never need to see or handle the products you sell.

3. There are **NO TRAFFIC ISSUES**

We simply take advantage of Amazon's FREE monster traffic and don't have to do any marketing or run any ads. Amazon shows your products to people who are looking to buy them, and that is how you make sales.

4. There are **NO SUPPLIER HEADACHES**

We only use products from US suppliers and to begin with we only sell these products to US based people. We don't have to worry about communication issues like you often get when dealing with China. Plus, we've already found the suppliers for you so you're not going to need to worry about this anyway.

5. Strategically purchasing inventory **LOWERS OUR RISK**

We only buy minimal inventory upfront. With many eCommerce models you need to spend as much as \$2000+ in inventory to begin

- and also need to deal with all the shipping and returns yourself.
Not with this!

6. The PROFIT MARGINS could be extremely high

Net profit margins for this system are on average 10% - 50%. As a hypothetical example, \$10,000 in sales could equate to \$1000 - \$5000 in profit margins.

7. You could see RAPID RESULTS

You DON'T need to spend weeks or months choosing a niche and "hero product"- and you don't need to worry about product development, branding or reseller certificates. Plus, as you are able to begin selling top-converting, high-margin products, you could start seeing results exceptionally fast, especially when you take advantage of the shortcuts we've been talking about.

8. You could DO THIS PART TIME

This system requires very little time to start and as little as 5 to 10 hours a week to run so you can continue to work your day-job or current online business (if you want to).

What we are going to present is something entirely different to anything we, or anyone else, has ever done.

It goes far, far beyond just a training program.

We're so excited about this, and really hope you can join one of the live Webcast sessions to find out more!

Remember, this is a **strictly limited opportunity** to get on a call with myself and my team, and to get ALL your questions answered.

Block some time out of your schedule and attend one of the sessions on Monday 22nd January.

They take place at **11am, 2pm, 5pm and 8pm ET** (New York Time)

I'd LOVE to speak to you on a live call, so select a time and register using the special link below.
